Education

University Institute of Technology, RGPV

Bhopal, India

B.Tech in Electronics & Communication Engineering — CGPA: 7.74/10

Aug 2022 – June 2026

Technical Skills

Languages: Java (Core), JavaScript, SQL, TypeScript

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Bootstrap, React Native, Next.js

Backend: Node.js, Express.js, RESTful APIs, JWT Authentication

Database: MongoDB, MySQL

Tools: Git, GitHub, Postman, ThunderClient, VS Code, Netlify, Eclipse, Render, Vercel, Docker

Core: Data Structures & Algorithms, OOPs, DBMS, MERN Full Stack

Experience

Freelance MERN Stack Developer

Nov(2025)- Present

Remote

- Designed and developed full-stack web applications using MongoDB, Express.js, React.js, and Node.js.
- Built responsive, animated, and user-friendly interfaces with React.js, Tailwind CSS, and Framer Motion.
- Worked on real-world freelance projects such as portfolio websites, gallery systems, and dashboard-based applications.

Full Stack Web Development Intern

Jan-Feb(2026)

Landmine Soft | Remote

- Developed full-stack web applications using the MERN stack, implementing features from database schema design to frontend UI and deployment.
- Built secure RESTful APIs with Express.js and Node.js, integrating JWT-based authentication and session management for a reliable React to MongoDB data flow.

Projects

HealthNexus – AI-Powered Health Platform | React.js, Node.js, Express.js, MongoDB | [Live](#)

- Secured Top 5 among 50+ teams at Navkalpana Hackathon 2026 (Theme: FitAI) by RICR & NIIST. Built a full-stack AI-driven health platform with BMI analysis, personalized diet plans, and fitness recommendations.
- Designed interactive dashboards with real-time data updates, wellness tracking, and fully responsive UI across all devices.

College Portal Management System | React.js, Node.js, Express.js, MongoDB | [Live](#)

- Engineered a MERN-based college management platform with role-based authentication for Admin, Faculty, and Student roles, supporting 500+ users with modules for student records, enrollment, attendance, and grades.
- Built normalized MongoDB schemas with Mongoose, indexing, and aggregation pipelines for optimized query performance and data integrity.

Craving – Food Delivery Web App | React.js, Node.js, Express.js, MongoDB | [Live](#)

- Developed a full-stack MERN food delivery platform with user/restaurant authentication, real-time menu browsing, cart functionality, and order placement.
- Architected RESTful APIs for restaurant and order management with location-based filtering using MongoDB indexing for high-performance queries.

Achievements & Certifications

TCS CodeVita Season 13: Qualified as a Global Qualifier in one of the world's largest programming competitions.

Navkalpana Hackathon 2026: Top 5 finish among 50+ teams in inter-college hackathon organized by RICR & NIIST.

Problem Solving: Solved 500+ problems on LeetCode & GeeksforGeeks with focus on DSA and algorithmic optimization.
